Profile

Offshore renewables project engineer with over a decade of experience delivering cable-route surveys, substation commissioning and stakeholder liaison across UK and European wind farm developments. Comfortable leading cross-functional teams through detailed design review and on-site commissioning.

Experience

Senior Project Engineer — Northwind Offshore Ltd

March 2019 — Present

- Led cable-route survey planning for three consented offshore sites, coordinating with regulatory bodies and subcontractor dive teams.
- Managed a £4.2m commissioning budget across two substation upgrades, delivering both ahead of the contractual milestone.
- Mentored two graduate engineers through their Chartership portfolios.

Project Engineer — Cerulean Rail Group

August 2014 — February 2019

- Delivered signalling upgrade works across four regional depots, coordinating possession windows with the infrastructure controller.
- Wrote the risk register template still in use across the engineering programme office.

Graduate Engineer — Solstice Grid Systems

September 2012 — July 2014

- Rotated across grid-connection design, site supervision and asset management, gaining an IEng-track portfolio.

Education

MEng Civil & Offshore Engineering, University of Aberdeen, 2008–2012 — First Class.

Incorporated Engineer (IEng), Institution of Civil Engineers, 2016.

Skills

Cable-route survey design, substation commissioning, stakeholder liaison, risk registers, AutoCAD, Primavera P6, IEC 61850, offshore HSE (GWO certified).
