Profile

Structural engineer specialising in wind turbine foundation design, with a background spanning consultancy and contractor-side delivery across four grid-connection programmes.

Experience

Structural Engineer — Meridian Subsea Ltd

Led foundation design reviews for a 40-turbine array, liaising directly with the geotechnical survey team and the client's independent checker.

Design Engineer — Northwind Offshore Ltd

Delivered detailed design packages for jacket foundations, working closely with the fabrication yard to resolve tolerance queries during build.

Junior Engineer — Solstice Grid Systems

Supported cable-route survey planning and produced as-built drawing sets for the client's asset register.

Education

MSc Structural Engineering, University of Strathclyde, 2015–2016.

BEng Civil Engineering, University of Strathclyde, 2011–2015.

Skills

Foundation design, geotechnical liaison, Tekla Structures, Eurocode 3, fabrication tolerance review, client reporting.
